BD Microtrol™ Discs

BD Microtrol™ discs are pure strains of viable freeze-dried bacteria in activated charcoal for use as control organisms.

They offer the following features:

- First generation from recognised national culture collections.
- Easily storable source of viable microorganisms with long shelf-life.
- Between 10⁷ - 10⁹ organisms in each disc.
- Direct inoculation on surface or establishing liquid culture.
- BS EN ISO 9001 certification.

Usage:

- Quality control of bacterial growth media.
- Quality control of methods and materials for antibiotic susceptibility of bacteria (e.g. BD Phoenix).
- Screening the concentration of antibiotics in blood, CSF etc.
- Controlling the staining reactions and chemical reactions during the identification of bacteria.
- Quality control of antiseptic and disinfectant solutions.
